

Structured M.D. / Ph.D. curriculum "Molecular Mechanisms of Regenerative Processes"

Agenda of the Participants' Camp - WS 11/12

Saturday, 17th of December 2011

| | | |
|---------------|-----------------------|---|
| 09:00 – 09:15 | M.O. Glocker | Welcome and Introduction |
| 09:15 – 10:15 | B. Grunow (Lübeck) | Key note lecture Fish cell cultures as a robust read out system in applied research |
| 10:15 – 10:35 | C. Röwer | Preparation, refinement and validation of a proteome signature for invasive ductal breast carcinoma |
| 10:35 – 10:55 | M. Al-Majdoub | Mass Spectrometric Epitope Analysis on Ro52, an Autoantigen in Sjögren Disease and Systemic Lupus Erythematosus (SLE) |
| 10:55 – 11:45 | All Participants | Discussion and Exchange of Experiences between Doctorate Students, Supervisors, and Mentors |
| 11:45 – 12:05 | M. Wölter | Characterization of intrauterine growth restriction by mass spectrometric profiling of cord blood samples |
| 12:05 – 12:25 | M. Ludwig | Characterization of the CD117+AT2R+ stem cell population with Patch-Clamp |
| 12:25 – 12:45 | S. Zaatreh | Evaluation of new anti-microbial implants in two-stage revision of total hip or knee replacement |
| 12:45 – 13:00 | M.O. Glocker | Summary and Farewell |

Chair: C. Röwer

Location: Seminar room (ground floor) of the BMFZ; Schillingallee 69, Rostock
