

## Structured MD/PhD curriculum:

„Molecular Mechanisms of  
Regenerative Processes“

Head of the curriculum committee:  
Prof. Dr. Michael O. Glocker  
Phone: +49 381 494 4930  
E-Mail: michael.glocker@med.uni-rostock.de

<http://www.med.uni-rostock.de/index.php?id=811>

## Organisation:

Dipl. Biol. Ramona Heinemann  
Phone: +49 381 494 4926  
E-Mail: ramona.kirsch@uni-rostock.de

MSc. Marion Ludwig  
Phone: +49 381 494 6105  
E-Mail: marion.ludwig@med.uni-rostock.de

## Location:

University Library Rostock  
Albert-Einstein-Str. 6, seminar room 11/12  
18059 Rostock

## Cooperation Partners:

- Graduate Academy of the University of Rostock
- Proteome Alliance e. V.

4th Participants Camp

6. / 7. December 2012

# Molecular Mechanisms of Regenerative Processes

In the Rostock University Library

The conference is open to all interested students,  
MD/PhD students, Postdocs, faculty, and staff

# General Information

The Participants `Camp is an event of the structured study path *Molecular Mechanisms of Regenerative Processes* at the University of Rostock.

In this context our junior scientists take the opportunity to present their topics, which are focused among others on stem cell research and the involvement of genes and proteins in regenerative processes related to human health.

This interdisciplinary and international orientated programme is offered by the University Medicine Rostock and provides qualified young scientists the opportunity to gain an MD degree (*Dr. med. (medicinae)*), or a PhD degree (*Dr. rer. hum. (rerum humanarum)* or *Dr. rer. nat. (rerum naturalium)*) in the field of Life Science.

Med. Biotechnologists with a Master degree and students of the University Medicine (prerequisite: 1. state examination) as well as scientists of the Faculty of Mathematics and Natural Sciences and of the Faculty of Agricultural and Environmental Sciences (prerequisite: Dipl./ Master's degree in Life Science) are most welcome to enrol for our curriculum.

# Programme

Time	Thursday; 6th December, 2012
16:00	<b>Prof. M. O. Glocker</b> Welcome and Introduction
	<b>Keynote Lecture</b>
16:15	<b>Dr. U. Pecks</b> Lipids and lipoproteins in fetal development - on the way towards pathophysiological molecular signatures
	<b>Session I</b>
17:00	<b>Prof. O. Hakenberg</b> Clinical Therapies for Bladder Cancer patients: established procedures and novel developments
17:20	<b>G. Mukherjee</b> Phosphopeptide enrichment strategies: a critical comparison
17:40	<b>Prof. G. Gradl/ Dr. P. Herlyn</b> CRPS - the clinical entity and some current approaches of experimental modeling
18:00	<b>M. Jacobs</b> Characterisation of Complex Regional Pain Syndrome I by mass spectrometric methods
18:20	Summary
Friday; 7th December, 2012	
09:00	<b>Prof. M. O. Glocker</b> Welcome and Introduction
	<b>Keynote Lecture</b>
09:15	<b>Dr. D. Suckau</b> Molecular Histopathology by MALDI-MS Imaging: Accessing the Molecular Tissue Morphology and Disease
	<b>Session II</b>
10:00	<b>Prof. M. O. Glocker</b> Next Generation Autoimmune Disease Diagnostics Based on Mass Spectrometric and Peptide Chip Epitope Analysis - Approaching Individualized Medicine
10:20	<b>M. Al-Majdoub</b> Mass spectrometric epitope mapping with polyclonal antibodies
10:40	<b>Coffee break</b>

# Programme

Time	Friday; 7th December, 2012
	<b>Poster presentation</b>
11:00	<b>A. Schade</b> An Innovative non-viral strategy for efficient micro-RNA delivery in human mesenchymal stem cells
11:15	<b>M. Ludwig</b> CD117+ AT2R stimulated bone marrow cells protect neonatal cardiomyocytes under hypoxic condition
11:30	<b>K. Opuni</b> Using a novel mass spectrometric epitope mapping without immobilization of the antibody to develop a screening procedure in autoimmune patients for personalized therapies
11:45	<b>S. Zaatreh</b> Implant-related infections: an in-vitro analysis of the periprosthetic infection
12:00	<b>R. Heinemann</b> Proteome profiling of the Complex Regional Pain Syndrome I - related rat model: "Exaggerated Trauma Response (ETR)"
12:15	<b>J. Yang</b> Proteome Signatures of Free Flaps - Protein Profile Changes During Ischemia and Reperfusion
12:30	<b>M. Wölter</b> Affinity-Mass Spectrometry: A Proteome Signature for Intra-Uterine Growth Restriction. Reveals Pathological Protein Glycosylation Aberrations in Umbilical Cord Blood
12:45	Summary and Farewell
